

# GENERATIONAL PRODUCTION WELFARE PROGRAM

## Generational Production Welfare Program

This is a program that aims at developing Generational Production Mindset (GPM) and convenient environment through psychological assistance to people planning or involved in production.

GPM is a mindset that enhances an individual to be open to ideas, digest ideas and come out with valid conclusions that makes him/her initiate a production that aims at person and generational welfare.

There has been failure of families to prepare children properly to take care and be responsible of their family productions especially when they become adults. This has resulted to declining of the family productions thus contributing a stressful environment to the adult himself, members of the family, other people benefiting from the production but also the following generations which will miss the respective skills and benefits from that production.

However, there have also been productive people who miss generational production mindset which has led them to encounter depression, loss, low self-esteem, suicidal thoughts, psychological traumas, conflicts, low self-determination and develop physiological problems such as high blood pressure, cardiovascular problems, ulcers, reproductive problems and other more problems due to psychological discomfort.

That been the case, star of new generation1 office through the generational production welfare program aims to assisting productive people to develop generational production mindset which will minimize or totally get rid of those problems and then enhance good production for personal and generational welfare.

## Objectives of the program

- To promote generational production mindset.
- To promote psychological wellbeing before, during and after getting involved in production
